Education

Indira Gandhi National Open University

July. 2023 – July 2025

Master of Business Administration (Operations Management)

New Delhi, Delhi

Manav Rachna International University

Aug. 2017 – July 2021

Bachelor of Science in Electronics and Communication Engineering

Faridabad, Haryana

Experience

Zindagi Technologies

August 2026 – Present

Senior Project Coordinator

- Served as the primary point of contact for client coordination, ensuring clear communication and timely resolution of client needs.
- Managed the task and ticketing process, prioritizing and tracking items through to closure to ensure smooth project execution.
- Facilitated daily scrum meetings to track progress, identify blockers, and keep the team aligned on priorities.
- Conducted requirement gathering sessions with stakeholders to capture accurate and actionable project requirements.
- Analyzed business requirements and end goals to ensure project deliverables remained aligned with overall business objectives.
- Maintained thorough project documentation, including requirement documents, user stories, and change logs, to support transparency and audit-readiness across the project lifecycle.

Vallesoft (VS Design Worx PVT LTD)

March 2025 – July 2026

Project Manager

New Delhi, Delhi

- Defined and prioritized project tasks by translating business requirements into user stories and actionable backlog items, creating detailed schedules, milestones, and MVP-driven delivery plans to ensure timely and high-quality execution across ERP & CRM projects.
- Managed and groomed the product backlog in Jira, handling development tasks, change requests, and bug reports while facilitating Agile/Scrum ceremonies (sprint planning, daily stand-ups, retrospectives) to drive structured and efficient delivery cycles.
- Acted as the primary POC between clients and the development team, leading requirement gathering, user flow definition, and feature-level discussions, while delivering regular status updates, product demonstrations, and stakeholder communication.
- Collaborated with design and development teams to contribute to basic wireframing and solution structuring, ensuring alignment between user requirements, system workflows, and final product implementation.
- Coordinated User Acceptance Testing (UAT) cycles, validated APIs using Postman, and ensured seamless integration, faster debugging, and successful production deployments aligned with defined user stories and acceptance criteria.
- Prepared and maintained project documentation including SRS/BRD, user stories, backlog artifacts, RCA reports, compliance plans, and change logs, ensuring transparency, data integrity, and audit-readiness.
- Oversaw risk identification, mitigation planning, and roadmap alignment with delivery priorities, optimizing resource allocation and controlling project costs while ensuring milestone adherence.
- Conducted post-project reviews and iterative improvement planning for upcoming roadmap phases, aligning delivery outcomes with business goals and driving continuous process enhancement.

*Project Manager**Mumbai, Maharashtra*

- Led the end-to-end development of a Project Management SaaS platform, defining MVP scope, user flows, and key features such as project supervision and on-ground workforce tracking, while translating requirements into user stories and prioritized backlog items for the development team.
- Collaborated with field teams to understand real-world civil calculations and workflows, converting them into functional requirements, user stories, and system logic, enabling accurate measurement tracking and real-time project progress visibility.
- Digitized manual BOQ-based field operations by designing a mobile-first user flow and wireframe-backed solution, allowing supervisors to capture site images, report issues, and update work completion status directly from the field, significantly improving transparency and reporting efficiency.
- Built and automated monthly reporting workflows using UiPath Studio X, reducing manual reporting effort by 50 – 60% and ensuring consistent, error-free data processing.
- Developed real-time progress tracking dashboards using Zoho Analytics, enabling stakeholders to monitor KPIs, track project performance, and make data-driven decisions.
- Defined and aligned product roadmap phases in collaboration with stakeholders, ensuring smooth transition from MVP to enhanced feature releases while maintaining alignment with business goals and on-ground operational needs.

Vivo Mobile India*August 2021 – April 2022**SMT Engineer**Greater Noida, Uttar Pradesh*

- Interpreted blueprints and technical drawings to analyze upcoming projects.
- Captured technical schematics for use in project planning and execution.
- Analyzing and resolving the failures of Motherboard during testing.
- Tested and analyzed equipment design and performance feasibility to determine potential ROI

Projects

Cyber Range Bharat NCR*August 2026 – Present*

- Contributing to the development of Cyber Range Bharat NCR, a web-based cybersecurity range platform built for Rashtriya Raksha University (RRU).
- Enabled RRU to invite multiple tenants, such as the Air Force, Navy, Army, and other organizations linked to Indian critical infrastructure, to participate in cybersecurity exercises on an invite basis.
- Supported delivery of varied exercise formats including CTF, Attack-Defence CTF, and e-learning/training modules to help tenants identify cybersecurity gaps within their infrastructure.
- Enabled exercises built around replica network topologies modeled on real critical-infrastructure environments, allowing simulated attack and defence scenarios.
- Ensured replica topologies helped surface actual vulnerabilities and loopholes in critical infrastructure networks, enabling teams to identify and remediate real-world security gaps.

CRM and billing software*March 2025 – July 2026*

- Led the development and delivery of a CRM and billing platform tailored for wellness clinics, enabling end-to-end management from digital lead capture to customer billing and retention.
- Successfully delivered solutions for key clients including VLCC (India & Middle East), Alive Wellness, and Max Hair, ensuring alignment with diverse operational workflows and regional requirements.
- Designed a multi-clinic architecture, allowing centralized control with location-wise data management, improving scalability and operational efficiency across multiple branches.
- Enabled seamless integration with multiple third-party vendors via APIs (payment gateways, client nurturing systems, etc.), enhancing system interoperability and automation.
- Ensured compliance by implementing GST-compliant billing and sales reporting modules, supporting accurate financial tracking and regulatory adherence.

School ERP*March 2025 – July 2025*

- Led the delivery of a School ERP platform for SOS Hermann Gmeiner Schools, designed to manage academic and administrative operations across multiple institutions.

- Defined role-based modules and user flows for students, teachers, and admins, including a mobile application with secure login-based access.
- Implemented custom assessment and result management systems along with GST-compliant fee collection and reporting modules, aligned with client-specific requirements.

Project Management Software (Civil)

December 2022 – February 2025

- Led the development of a civil project management platform for Government of India initiatives (Jal Jeevan Mission – Rajasthan & Maharashtra), enabling centralized monitoring of large-scale infrastructure projects.
- Defined user flows, key modules, and backlog items, covering BOQ management, manpower tracking, and physical vs financial progress mapping to ensure structured execution and real-time visibility.
- Digitized field operations by introducing site-based photo reporting, allowing teams to capture work progress and mark attendance from on-site locations, improving transparency and accountability.
- Built real-time dashboards for quick analysis of project performance, enabling stakeholders to track progress, identify gaps, and make data-driven decisions efficiently.

Skills

Project & Product management: Agile Methodology, Backlog Management & User Story Definition, Product Lifecycle Management, MS Project, Zoho Projects, Jira, Requirement Gathering & Stakeholder Management, UAT Coordination & Release Management, Project Documentation (BRD, FRD, SRS, User Stories, Change Logs)

Technical & Analytical Skills: API Testing & Validation (Postman), Data Visualization & Dashboards (Zoho Analytics), Basic Wireframing & User Flow Design, SQL (Basic)

Domain & Business Skills: ERP & CRM Systems Implementation, Multi-tenant (Multi-Client / Multi-Location) System Design, Process Optimization & Automation, Client Communication & Consulting, Cybersecurity, Network Topology, Networking
